PROFESSIONAL SUMMARY

Full-Stack Software Engineer who ships independently — designed, built and deployed a production Next.js/TypeScript site with a Supabase-backed contact pipeline, built an AI tool on the OpenAI API with a React/Node.js stack, and migrated a Python application to Azure SQL Database with a pytest test suite. Former lawyer, now writing code with the same attention to detail.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, SQL (T-SQL), C++, HTML/CSS
- **Frontend:** React, Next.js (App Router), Tailwind CSS, Vite, Responsive Design, Accessibility, SEO / Open Graph
- **Backend & APIs:** Node.js, Express, Next.js API Routes, REST APIs, OpenAI API Integration, Prompt Engineering, Resend
- **Cloud & Data:** PostgreSQL (Supabase), Azure SQL Database, SQL Server, SQLite, Vercel, DNS / DMARC configuration
- **Testing & Workflow:** pytest, edge-case testing, input validation, Git/GitHub, CI/CD, Agile/Scrum, AI-assisted development (Claude, ChatGPT)

PROJECTS

Personal Portfolio Website — *Next.js, TypeScript, Tailwind CSS, Supabase, Resend, Vercel*

Live: alinakiptenko.com | GitHub: github.com/Alina201998/personal-website

- Rebuilt a client-side-only React site as a server-rendered Next.js app so pages are indexable, adding Open Graph metadata, sitemap/robots and Google Search Console integration
- Built a contact pipeline through a Next.js API route that stores leads in Supabase PostgreSQL and sends notifications via Resend on a verified custom domain (DKIM/DMARC)
- Deployed on Vercel with CI/CD from GitHub, custom domain and canonical redirects; mobile-first responsive layout with an accessible navigation menu

Polling Place Finder Desktop App — *Python, Tkinter, Azure SQL Database, T-SQL, pytest*

GitHub: github.com/Alina201998/polling-place-finder | [Demo](#)

- Migrated the database layer from on-prem SQL Server to Azure SQL Database, updating the pyodbc connection layer for cloud connectivity
- Refactored core logic for testability and built an automated pytest suite covering query accuracy and edge cases, eliminating inaccurate output
- Modernized the Tkinter GUI and queried polling location data via multi-table JOINS and T-SQL

LinkedIn Post Generator (AI/ML) — *React, Node.js, Express, OpenAI API*

GitHub: github.com/Alina201998/linkedin-post-generator | [Live Demo](#)

- Engineered a full-stack AI pipeline connecting a React frontend to a Node.js/Express backend through a REST API, turning a single input into 2–3 tailored post variations
- Iterated on prompt structure after early versions produced generic output; validated final quality through structured testing with multiple users, who rated results usable with minimal editing

Mood Tracker Android App — *Java, Android Studio, SQLite, RecyclerView*

GitHub: github.com/Alina201998/Mood-Tracker-AndroidApp | [Demo](#)

- Applied object-oriented programming principles in Java to build a full CRUD Android application
- Designed and executed test cases covering 7+ edge cases, eliminating crashes across every scenario tested

PROFESSIONAL EXPERIENCE

- **Legal Consultant/Advisor, EMERCOM (2021–2022):** Handled case files and incident records, ensuring legal accuracy and regulatory compliance
- **Front Desk Receptionist, Sport Plus / Prime SportClub (2019–2020):** Processed high-volume client billing and scheduling with zero errors

EDUCATION

Harold Washington College, City Colleges of Chicago — Jan 2023 – Dec 2025 | Chicago, IL

- ESL Program (2023–2024) → Advanced Certificate in Software Development (Aug 2024 – Dec 2025), GPA 3.70/4.00
- Coursework: OOP (C++), Client-Server Databases (SQL), Web Development, SDLC

B.A. in Jurisprudence (Law), Rostov State University of Economics — Jul 2021 | Rostov-on-Don, Russia

Work authorization: Authorized to work in the U.S. (green card, no sponsorship required); willing to relocate. **Languages:** Russian (native), English (fluent).
